Ziwani/Simba Team

De-Snaring Report for June, 2013

Monthly Summary

Simba team received a new team leader and some members in the last half of the month of June. The team conducted some patrols around Kangenchwa area in the Southern area of Tsavo West National Park. However the team spent most of this remaining time of the month familiarizing with the area.

In Ziwani area for instance after continued overgrazing by cattle, grass was gradually sprouting. This is after cattle were driven out the previous month thus reducing competition with wild animals.

The team had enough time to familiarize with this area and will embark on full and regular patrols next month.

Report compiled by
Joseph Macharia.
