**DE-SNARING REPORT
AUGUST 2013**

BURA/FARU TEAM

Burra/Faru Team

De-Snaring Report for August, 2013

Participants

Alfred	Mwakatimi
Dennis	Lemerwas
Moses	Simiyu
Julius	Kyalo
Daniel	Lelekoiten

Areas Patrolled

Murondo Ranch
Irima
Kilifi Ranch
Kizingo Ranch
Kulalu Ranch
Lion Hill
Dakota Ranch
Mbulia
Voi River
Ndara
Ndi
Satoa
Sobo
Tsavo River
Voi
Magruni Ranch

Arrests

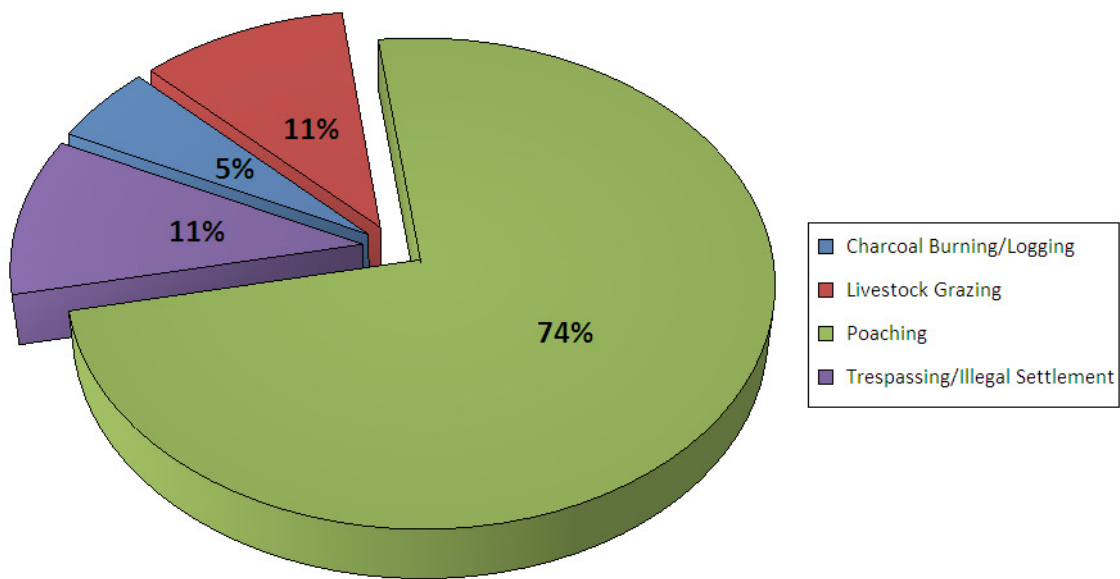

10 Arrest(s) this month

Burra/Faru Team

De-Snaring Report for August, 2013

Main Illegal Activities experienced during the Month

De-Snaring Report for August, 2013

Snares Collected

Snare Type	Snare Size	Snare Description	No. Confiscated
Thin Wire	Small	Scattered	44
Thin Wire	Small	Line	9
Medium Wire	Medium	Scattered	25
Medium Wire	Medium	Cluster	42

Total Snares Collected: 120

Burra/Faru Team

De-Snaring Report for August, 2013

Monthly Summary

DESNARING SUMMARY- FARU TEAM
AUGUST 2013

The team camped at Dakota for the first half of the month. This was to enable it cover the farthest parts of the park as well as the many ranches across; after all, many incidences of poisoned arrow activities had not only been reported but observed as well. In fact, two Jumbos had already succumbed to this but Bura team and the KWS rangers recovered their Ivory tusks before they were pulled out by poachers.

Patrols were therefore intensified with hot spot areas receiving most attention; both day, evenings and night and as much as no actual arrests were made, substantive achievement was realized in preventing crimes at least for the time the team was on patrol.

Affected elephants were carefully traced and treated and subsequently monitored. So far, they are all doing well; with them having resumed their activities. More and more monitoring is scheduled to see to it that full healing is realized. Livestock incursions were however observed to be notorious and hence after careful strategizing, 10 men were caught and charged with the offence at the time.

The second part of the month was focused on the following areas; Lion Hill, Voi Safari lodge, Irima, Ndii, Mbulia and Tsavo River. In all these, a total of 120 snares were lifted and in one case, an ensnared Impala was rescued and treated.

In addition, the team also participated both directly and indirectly in rescue of a lone and abandoned baby Elephants within the area. Such cases have been so many; this could also be because of the biting drought which has deprived nature with abilities to sustain all biota adequately.

This good work continues nevertheless.
