De-Snaring Report for June, 2012

Monthly Summary

The Teams work progressed as usual after the team joined neighbouring Kenze Team following nine days off at the beginning of the month. Relatively fewer snares were lifted this month compared to previous months; possibly due to the persistent pressure from the teams mounted against the perpetrators.

General illegal activities within the forest seemed to slow, with 17 illegal firewood collectors being arrested. The DSWT has set camera traps in various parts of the Kibwezi forest and on one night the camera caught three men drawing water from the Umani spring. The DSWT joined efforts with KWS to patrol the area heavily to ensure no trespassers' were still in the area.

Pertaining community work, two primary schools, Maikuu and Metava got the privilege of visiting Tsavo West National Park, courtesy of the Trust's school trip program. Acknowledgement letters to this respect have since been received from the respective beneficiaries and filled accordingly.
