#### **Illegal Activities**

<b>Illegal Activity</b>	<b>No. Incidents</b>	<b>Location</b>	<b>Percentage</b>	<b>Scale</b>	<b>Arrests</b>
-------------------------	----------------------	-----------------	-------------------	--------------	----------------

\* 'Percentage' indicates the overall percentage occurrence (encountered by all de-snaring teams) of that particular illegal activity during the selected month.

#### **Monthly Summary**

## **Chyulu Team**

### **De-Snaring Report for March, 2011**

#### **Monthly Summary**

The month was very busy and a total of 18 people were arrested, out of which 6 were charcoal burners. The Metava area had the highest number of illegal activities taking place. The rains have not arrived as expected in the month of March, and that means draught is looming yet again. The Team expects more arrests in the coming months due to dry conditions which urge more farmers to take to illegal activities as a source of income.

Lamping season has also begun and there have been signs of illegal killing in the ranches. The Team is making use of the aerial support from the DSWT pilot to supplement the ground patrols and success has already started being noticed. About 3 people have been arrested in conjunction with aerial support, making the Team more efficient.

The second phase of Kibwezi forest fence line has started, and going on well. The Team anticipates it will be completed soon and the issue of human-wildlife conflict will be a thing of the past.
