### De-Snaring Report for July, 2013

#### Snares Collected

Snare Type	Snare Size	Snare Description	No. Confiscated
Thin Wire	Small	Cluster	26
Thin Wire	Medium	Cluster	9
Cable	Large	Line	1

<b>Total Snares Collected:</b>	<b>36</b>
--------------------------------	-----------

## Chyulu/Duma Team

### De-Snaring Report for July, 2013

#### Monthly Summary

Duma team began its operations on 18th July 2013 after a 15day break. The team then patrolled Metava, Kari, Utu, Kikunduku, Kensili, and Kisula.

##### Metava

This is an area near Chyulu park headquarters and is known hotspot zone for woodcarving, snaring and logging activities. The team patrolled this area where human foot prints seemed to dominate the area with which some where their track grew cold and others led us to old hideouts. The team also managed to get fresh hideout which seemed to be an operational base for poacher since we were able to find a reserve of maize flour and four twenty litre jars full of water.

##### Kari

This is a government land which is used for agricultural research and at the same a habitat for variety of our wild animals. The team patrolled this area and managed to lift snares, and arrested charcoal burners who were found there without permits of entrances and charcoal burning.

##### Kikunduku

This is an area inside the park near Chyulu hills and is known hot spot for charcoal burning. The team patrolled this area and found charcoal burning was at it heights where the team managed to arrest charcoal burners and impounded charcoal burning tools.

##### Kensili

Kensili is a small outcrop beside Chyulu hills where there are many animal trails. Poachers take an advantage to target animals when going up and down the hill. Duma team patrolled this area and managed to lift a huge elephant snare which seemed to be new. We instituted our investigation with the help of our informers and found out that the snare

##### Kisula

This is an area near Kisula cave and is well known for wood carving. We patrolled this area and managed to destroy hideouts and also lifted snares which target at bushbucks and other antelopes found there.

##### Utu

This is a known charcoal burning zone. We patrolled this area and managed to apprehend some charcoal burners. Logging also is very high needless to mention destruction of trees which is contributed by charcoal burners
