### **De-Snaring Report for July, 2013**

#### **Monthly Summary**

##### AREA OF OPERATION.

Umani springs, Algon, forest itself, Duma area and the fence line.

##### FINDINGS

Kibwezi remains the main priority in our patrol efforts. It is very important to deter any activity that would violate the biodiversity and environmental balance of the forest. Kenze team is dedicated to this cause by ensuring that there are no illegal activities happening in the forest. Our continued presence in forest and domination of the ground has prevented the poachers from actively and successfully operating in the forest. We made few joint operations with our KFS personnel during the month of July. Two people were captured by camera trap at the spring drawing water and they headed back to the park. This is an indicator that there could be poachers who are looking for elephants and those interested in woodcarving. The team managed to destroy two shooting platforms. The team has decided to concentrate its efforts in the area for the sake of elephant and other species.

In the other areas patrolled, no illegal activities were recorded. Generally, as the drought continues to bite we expect animals to be concentrated around the springs. Plenty of bushbucks, buffaloes, crocodiles, and elephants are being seen daily. In the coming month, operation will target the spring where the majority of the wildlife are expected to be found.
