De-Snaring Report for November, 2010

Monthly Summary

The number of illegal activities in the Triangle and Mangelete areas have decreased due to the fact that majority of the communities were busy in their farms as the area received a lot of rainfall. Charcoal burning and logging is still ongoing so the Team needs operation.

The team distributed many tree seedlings in the surrounding community, this being the best time for tree planting as the rains. Communities really appreciated this gesture as many of them have started to realize the importance of conserving their environment. Kyusiani Primary school benefited from a wildlife video show. The main challenge in this month's community work is that the trees to their demand hence the nursery at Kaluku was struggling to keep up with demand.
