Cable	Large	Scattered	30

<b>Total Snares Collected:</b>	<b>45</b>
--------------------------------	-----------

#### Community Work

Target Group	Target Group Name	Activity	Location
School	Maktau Primary School	Donation	Maktau

#### Monthly Summary

## **Ziwani Team**

### **De-Snaring Report for April, 2011**

#### **Monthly Summary**

During the month of April the Ziwani team operated from 1st/4/2011 to 23rd/4/2011 before going off duty. Many of the large snares lifted in Taita Wildlife Sanctuary of were targeting giraffe, as the snares were hung up high in the tree foliage targeting their neck while they feed. The Team came across two poached elephant carcasses at Mwasui ranch and Maktau areas respectively, the tusks of the Maktau elephant were removed by K.W.S authorities while the elephants at Mwasui had its tusks cut off and taken by the poachers. The Team highly suspected the charcoal burners at the ranch since the nine (9) bags of charcoal were found near the elephant carcass, this information was relayed to K.W.S authorities for further investigation.

Several charcoal burners hideouts were sighted and destroyed. The Team helped in the treatment of an elephant bull with an arrow wound at Lualenyi Ranch with the Tsavo Mobile Vet Unit. The bull's prognosis is good, and the Team monitored him on various occasion during the month.

Due to the prevailing human wildlife conflict the team came across an injured person at Maktau who was chased by an elephant as he tried to chase it out of his farm.
