Snare Type	Snare Size	Snare Description	No. Confiscated
Thin Wire	Small	Scattered	6
Cable	Large	Scattered	13
Cable	Large	Line	30

Total Snares Collected: 49

Monthly Summary

Ziwani Team

De-Snaring Report for October, 2011

Monthly Summary

This month the Ziwani team was off duty from 1st to the 9th of October. The team has noticed a drastic reduction on the number of snares lifted this month compared to last few months. This has been contributed by heavy rains within these areas and most of people are busy in their farms and are not concentrating on poaching activities.

All the snares lifted targeted big game; The Team came across two carcasses, one of a giraffe at Lualenyi ranch killed via poaching (snare) and another one of an elephant at Toloa near Lake Jipe with the tusks missing. The Team also found a shooting platform on the same area as the elephant carcass which was in a tree near a snare fence line.

This month the team conducted two ecological trips to Tsavo East National park. The beneficiary students were from Mbulia Primary School. The children had never visited the park and highly appreciated the gesture and thanked the trust for the opportunity granted to them.

During the trip the students visited the main attractions of the Park such as Mudanda rock, Lugards falls, Aruba dam and later visited the elephant stockade at Voi where they interacted with orphans.

Summary by Nicodemus Kivindyo. (Team Leader)

Ziwani Team

De-Snaring Report for October, 2011

Mbulia primary at mudanda rock

Mbulia primary at the Voi stokade

Ziwani Team

De-Snaring Report for October, 2011

Pulpils at mudada rock in Tsavo East NP

A large snare

Ziواني Team

De-Snaring Report for October, 2011

Some of the remains of a giraffe carcass at Lualenyi ranch

A shooting platform at Toloa area

Ziwani Team

De-Snaring Report for October, 2011

An elephant carcass at toloa area, the tusks missing.

Charcoal burning at Mkuki ranch
