School	Msorongo Primary School	School Trip	Msorongo
School	Msorongo Primary School	School Trip	Msorongo
School	Msorongo Primary School	School Trip	Msorongo

#### Monthly Summary

## **Ziwani Team**

### **De-Snaring Report for February, 2011**

#### **Monthly Summary**

During the months operations the team recovered an elephant tusk (one) near Lake Jipe which was old; no elephant carcass was seen nearby. The tusk weighed 9.3kgs and was handed over to KWS.

The Team found an elephant carcass killed by poison arrows in the Maktau area inside park with tusks missing. The Team also came across an impala carcass killed by a snare at Lualenyi ranch.

Charcoal burning and logging was prevalent at Lualenyi ranch, the Team spoke to the management of the ranch to try and find a mutual solution to this problem. A new poaching fence line was found at Lake Jipe area prepared for snares targeting animals going to the lake to quench thirst.

The Team anticipates a tough year ahead as the rains have not been sufficient and many crops have failed. The more people suffer financially and from a food supply aspect, the more they turn to illegal activities as a source of income.
